Inf 43: Introduction to Software Engineering
Instructions for downloading SimSE
For Discussion Sections

1. Download the [SimSE Player's manual](http://www.ics.uci.edu/~emilyo/teaching/info43f2014/misc/SimSEPlayersManual.pdf) at
    http://www.ics.uci.edu/~emilyo/teaching/info43f2014/misc/SimSEPlayersManual.pdf.
    Read all of it except for Section 5.
2. If you have a laptop that you can bring to discussion, download the SimSE inspection
    game (inspection.jar) from the class website (under the Assignments tab).

You should be able to run the game by simply double-clicking on the file. If you do not have the
current version of Java installed on your machine, you will have the opportunity to install it
when you try to run a game.

If you do not have a laptop to bring to discussion, you can simply join in with someone who
does.

You will play the game and answer questions about it in discussion.
